

At Elephate we do internet marketing, analyze and optimize websites for search engines, and run content marketing campaigns. We are currently looking for a **full-time intern** for our technical SEO department.

Technical SEO Intern

Forget tedious link-building and writing catalog descriptions - that's not what we do! Working at Elephate will offer you a great deal of challenges and possibilities to develop your online marketing skills. You'll get a chance to participate in interesting international projects and get familiar with the best tools that are currently available on the market.

We're looking for an intern who can do technical SEO for big e-commerce clients (and more).

During your paid internship you'll deal with such tasks as:

- website audits, optimization, and structure analysis for SEO purposes
- data analysis using dedicated tools
- preparing recommendations and reports (mostly in English)

We will be happy to work with you if:

- speaking and writing in English is not a problem for you
- you're willing to learn from the best SEO specialists in Poland
- you're familiar with Excel and know the basics of HTML and CSS - any experience in programming will be an advantage
- you're interested in new tech and are willing to expand your knowledge
- think analytically and can present complicated ideas in an accessible way
- even the stupidest jokes make you laugh ;)

We're looking for someone:

- ready to get involved,
- independent,
- wanting to extend their knowledge,
- creative,
- thorough and meticulous.

We offer:

- an internship in a globally operating agency,
- work on some of the biggest SEO projects in Poland,
- multiple development opportunities and a friendly atmosphere,
- a variety of projects that you won't get bored working on,
- 1000zł net pay (during the internship),
- a chance to get hired after the internship,
- delicious pizza on Fridays!
